About me

Software developer based in Montenegro, building web applications front to back - from database and APIs through the UI and deployment. TypeScript and React are where I'm strongest, while my professional work also includes Oracle APEX, SQL, .NET and C#. I work across enterprise and government-facing software, independent web products, real-time applications and game development. I use AI-assisted tooling such as Claude Code and MCPs in my workflow while keeping architecture, testing and maintainability as engineering decisions.

Core stack

Frontend: TypeScript, JavaScript, React, Next.js, HTML5, CSS3
Backend & data: Node.js, Express, Oracle APEX, C#, .NET, SQL, WebSockets
Tools: Git/GitHub, Vite, Vitest, Playwright, Claude Code, MCPs, UI/UX
Creative: Three.js / React Three Fiber, Godot 4, GDScript

Pavle Tošić

SOFTWARE DEVELOPER

Work experience

Software Developer — Infostream
Montenegro · December 2025 - Present

- Build and maintain enterprise and web applications using Oracle APEX and SQL, with .NET/C# and JavaScript/TypeScript/React where required.
- Designed and built Infostream's new company website end to end.
- Built a live PDF workflow that updates documents dynamically from client form input.
- Built an AI-assisted smart search feature for Infostream, including staff lookup by JMBG and other identifying fields.
- Built the ASK tender portal as an Infostream test/prototype project; it is not a production deployment.
- Contributed to the Government of Montenegro's NGO Register Portal (ngo.gov.me) and created official video tutorials for e-signature, document signing, registration and registry search.

Founder & Developer — Vaky.me
Independent web studio

- Design and build custom business websites covering UI/UX, frontend engineering, deployment, hosting and maintenance.
- Built the bilingual Vaky platform and local-business web projects focused on responsive design, mobile performance and practical business needs.

Selected projects

Mandarina Apartments
mandarinapt.me
Production website for Mandarina Apartments.

Villa Vučje
villavucje.me
Production website for Villa Vučje.

Vaky.me
Bilingual web-studio platform and showcase of responsive business-site concepts for local service businesses in Montenegro. [Next.js · TypeScript]

Ashen Reaper
in progress
2D action RPG with an interconnected world, four-act story, multiple zones, bosses and dialogue-driven NPCs. [Godot 4 · GDScript]

KAISETSU
in progress
Atmospheric 2D soulslike built around island exploration, distinct biome zones, bosses, NPCs and branching endings. [Godot 4 · GDScript · PixelLab]

CryptoFlow
General Assembly, rebuilt 2026
Real-time paper-trading terminal with Binance market streams, spot/futures simulation, server-authoritative settlement and concurrency-safe wallet operations. [React · TypeScript · Django · WebSockets]

Arc: Anime Tracker
General Assembly, rebuilt 2026
Anime tracking app with live AniList catalogue search, watchlists, progress tracking, ratings and personal viewing statistics. [Next.js · TypeScript · AniList API]

Ronin Duel
General Assembly, rebuilt 2026
Browser-based 2D fighting game with frame-aware combat, AI difficulty modes, local multiplayer and a separately testable combat core. [Phaser 4 · TypeScript · Vite · Vitest]

Meet2Explore
General Assembly, 2025
Team-built travel platform for discovering Montenegro, creating trips, joining groups and chatting live with travel companions. [React · Node.js · Express · Socket.IO]

Education

Fullstack Software Developer — General Assembly
Sep–Dec 2025 · 420+ hours covering frontend, backend fundamentals, APIs, databases, security and team projects.

Ethical Hacking — Z-Security, Udemy
2023–2025

Secondary education
Kosta Cukić Private High School, Belgrade (final two years) · Mirko Vešović Economics High School, Podgorica (first two years)
