FRONTEND

HTML5 CSS3

Responsive design

BACKEND & DATA

Node.js Express REST APIs

SQL Oracle APEX

WORKFLOW & DESIGN

AI-assisted dev MCPs

UX / UI Git & GitHub

Debugging

// languages

EnglishPROFESSIONAL

MontenegrinNATIVE

// profile

Software developer at Infostream, working mostly with Oracle APEX, .NET, and C#. JavaScript and TypeScript are my strongest area, and I'm happy to pick up whatever framework or library a project needs instead of sticking to one. I build web apps front to back, and with AI tools and MCPs I move fast and cover the design and UX side too, not just the programming. Open to full-time or part-time, remote work.

// experience

Software Developer — Infostream

PRESENT

- Build and maintain web and enterprise applications using **Oracle APEX**, **.NET**, and **C#**, alongside JavaScript/TypeScript and React.
- NGO Register Portal (Government of Montenegro)** — produced the official user-guide video tutorials covering the qualified e-signature client, document signing, online registration, and registry search.
